

an axially movable cutting element that can move between a first position in which the cutting element is wholly disposed within the catheter body, and a second position in which the cutting element extends out of the cutting window.

60. (Added) The atherectomy catheter of claim 1 wherein the cutting element is rotatable.

61. (Added) The atherectomy catheter of claim 59 further comprising a ramp disposed in the distal portion of the catheter body to direct the cutting element out of the cutting window.

---

REMARKS

Claims 1-58 are canceled. Claims 59-61 are added.

CONCLUSION

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 650-326-2400.

Respectfully submitted,

**VERSION WITH MARKINGS TO SHOW CHANGES MADE**

Claims 1-58 are canceled.

59. (Added) An atherectomy catheter comprising:  
a catheter body comprising a proximal portion and a distal portion;  
a cutting window disposed on the distal portion of the catheter body;  
an axially movable cutting element that can move between a first position  
in which the cutting element is wholly disposed within the catheter body, and a second  
position in which the cutting element extends out of the cutting window.

60. (Added) The atherectomy catheter of claim 1 wherein the  
cutting element is rotatable.

61. (Added) The atherectomy catheter of claim 59 further  
comprising a ramp disposed in the distal portion of the catheter body to direct the cutting  
element out of the cutting window.
